

## Rouba Nassar

### Biography

Rouba Nassar is a Sustainability Design Engineer at EcoConsulting since 2018 working on conducting BREEAM and LEED assessments, as well as other eco-building services, assisting the team in evaluating and reviewing the best sustainability measures for each green building project. She has been involved in over 15 projects in Lebanon and abroad ranging from small residential houses to large developments, comprising BREEAM Very Good and LEED Gold assessments.

Rouba is the main coordinator of the Circular Hub activities. She is also involved in the seminars on “Eco-Building & LEED Green Associate Training” at the Circular Hub in Beirut, Lebanon.

Rouba holds an MSc. in Renewable Energies from the University of Saint-Joseph and a BEng. of Mechanical Engineering from the Lebanese University.

In her spare time, Rouba enjoys biking, ping pong, painting and photography.
