

Sustainability, Climate Change & Environmental Knowledge

This track is for anyone who wants to learn more about sustainability through various topics. You will have a better understanding of climate change and the environment, as well as how to actively take steps to mitigate our environmental impacts, whether individually, at work, or collectively.

Green Buildings & Sustainable Neighborhoods

This track has been designed to give architects, engineers, developers, landscapers, or any other construction professional a complete and methodical understanding of sustainable design & construction, with case studies & best-practice examples, and a preparation to green building certifications & LEED accreditations.

The Circular Economy & Eco-Design

This track will open your eyes about the Circular Economy, and how we can contribute to accelerating the change towards it. You will learn about the principles of designing for circularity, meaning designing out waste & pollution, keeping products & materials in use within the production or biological cycles, and regenerating natural systems.

Eco & Social Entrepreneurship

The aim of this track is to assist potential eco and/or social entrepreneurs in launching new environmental/social start-ups in a very practical way. You will learn how to convert step by step your Green or Social Business Ideas, or a new idea proposed during the workshops, into a sound & feasible business project and find solutions to the challenges of doing so along the way.

The Circular Hub is a learning space for broadening your knowledge about a variety of topics ranging from the environment & the circular economy to sustainability issues, climate change as well as eco & social entrepreneurship, through a wide choice of seminars, workshops, activities, and games.

By spreading environmental awareness and knowledge, we're aiming to ignite change and we want you to be a part of it too!

A circular economy is based on the principles of designing out waste and pollution, keeping products and materials in use within the production or biological cycles, and regenerating natural systems. It is a source of opportunity for business that improves quality of life and tackles global challenges like climate change.

At the Circular Hub, we encourage you, depending on your field of studies, professional background, and/or interests to attend and actively participate in our series of seminars & workshops in one of the following 4 Tracks that we offer:

Sustainability, Climate Change & Environmental Knowledge	SE Track
Green Buildings & Sustainable Neighborhoods	GB Track
The Circular Economy & Eco Design	CE Track
Eco & Social Entrepreneurship	EE Track

By attending a series of sessions related to each track, you will be able to obtain one or more of the 4 Certificates that we offer.

Why should you pursue a Certificate?

Each Certificate can be used as a proof of awareness and knowledge of a certain field, that can enhance your personal or company CV. It is a recognition that you have actively participated in a series of seminars & workshops provided by experts, including EcoConsulting, in the topics related to each track.

A Certificate validates your understanding of the issues at hand and enables you to apply them to your field of studies or work. It can be used as a reference coming from EcoConsulting, an established company with over 15 years of experience in the field of sustainability, with a track record in giving or animating environmental seminars, workshops, conferences and activities.

How to obtain a Certificate?

Each Certificate is obtained by actively participating in a minimum number of Circular Hub seminars / workshops and securing the number of Units for each track, as per the table below:

Sustainability, Climate Change & Environmental Knowledge	12 Units in SE Track 1/3rd or more from SE Track
Green Buildings & Sustainable Neighborhoods	12 Units in GB Track 2/3rd or more from GB Track
The Circular Economy & Eco Design	12 Units in CE Track 2/3rd or more from CE Track
Eco & Social Entrepreneurship	12 Units in EE Track 2/3rd or more from EE Track

Please note that:

- You can select the training/activity sessions that you prefer as long as a proportion of them (as per above table) belongs to the Certificate Track you are pursuing
- Some training/activity sessions are longer or more complex and count towards more than 1 Unit
- Some training/activity sessions count towards more than one track depending on the topic, when it is pluri-disciplinary
- Some activity/game sessions are just offered for fun or networking and do not count towards any track
- The number of units of some longer seminars/workshops may only partially count towards a Certificate

Each session is described in a comprehensive seminar sheet, which details which track(s) it belongs to and its number of Units.

More information about the Certificates and prices?

Check the [Fall Calendar](#) of seminars / workshops, our [Pricing Scale](#), and a description of the content of the [Green Buildings Certificate](#) you can earn. For more information about the different certificates or to obtain copies of the detailed seminar sheets, please contact our team at:

info@ecoconsulting.net or + 961 1 971 266 during weekdays, office hours.
